

# TRAFALGAR CONSULTING SUPPLIES WATER PLANTS

Our team of engineers design completely integrated **water treatment plants** from raw water intake to product water distribution and building specifications. Applications include brackish and surface water treatment and seawater desalination for industrial and commercial uses. The output is pure, potable water.  
**All systems are designed and manufactured in USA.**

Our custom designs and manufactures integrated industrial water treatment plants for seawater desalination, brackish purification and surface water purification.

#### Included in a Budgetary Quote:

- Process and Instrumentation Diagram (P&ID)
- General Footprint
- Engineering documentation

We can build on a skid-mounted system. These systems allow for easy installation and maintenance.

#### Deliverables Include:

- General Arrangement 3D drawings of all systems
- General Layout 3D drawings of plant with interconnecting piping
- Plant and system layouts in 2D CAD
- Electrical drawings
- Building specifications and loads
- Commissioning
- Personnel Training
- Technical handbooks
- Installation / Operation / Maintenance manuals

Your projects are supervised by our supplier Engineers throughout the life of the project.
